55 Inch Hanging Double-Sided Poster Screen Specifications-Ultra-thin Android Edition

1. Product Characteristics

WG-55EG3 hanging double-sided poster screen is our new ultra-thin all-in-one machine.

- Market mainstream professional Android scheme design, good heat dissipation, stable performance, easy to maintain;
- Highlight screen, 1080P FHD resolution, ultra-wide viewing Angle LCD panel, avoiding the viewing Angle blind spot of common similar products on the market, and further improving the display effect;
- The product adopts ultra-narrow frame, ultra-thin body, the thickness of the entire machine is only 23mm;
- Double-sided screen can show content synchronously, customers can simultaneously receive the video and picture visual impact brought by information release, increase the attraction and publicity of mobile customers and potential customers;
- Abandon the traditional passive receiving publicity methods such as troublesome replacement of traditional posters, no video and monotonous pictures, and bring more intense publicity effect;
- Network cable and power cable concealed routing design, the overall appearance is better;
- In the system design, adhering to the stability and advanced nature of the signage series products, to give customers the management experience;

3. Product Specifications

Screen Main Parameter	
Max Resolution	1080×1920
Viewing Angle	178(horizontal angle)； 178(vertical angle)
Colour	16.7M colours
Brightness	Standard brightness screen (both sides) > 480 cd/m² (standard brightness is the default for shipment) Special high brightness screen (A side) > 400 cd/m², (B side) > 700 cd/m² (prices vary)
Contrast	> 5000: 1
Response Time	< 8ms
Visible Area	680.4(H)×1209(V)

Backlight Form	LED
LCD Panel Screen Brand	LG original import Grade A Regulation
Backlight Life	50000Hours
Android Configuration	
CPU	**RK3288，Quad-core ARM-A17，1.8GHz**
GPU	Mail-T764
RAM	2G（Optional 4G）
ROM	16G（Optional 32G）
External Extended Storage	TF card（Max support 128G）
External Interface	USB×2 、RJ45×1
Ethernet	10/100M
Wifi	WIFI 802.11 b/g/n 2.4GHz
Remote Control	Infrared remote
Custom	WIFI/BT/3G, 4G
Software Configuration	
Operating System	Android
Basic Software	Web browsing, web chat, email, e-books, Explorer, clock, alarm clock, calculator, recording and more
Functional Characteristics	Remote software control timing on/off
	Dual screen different display, inside and outside screen can play different content respectively
	Dual screen separate control, the internal and external screens can define the timing switch off different periods, such as the internal screen can be turned off at 18:00 after work, the external screen can still play and define to turn off at 21:00
	Real-time remote control, 7*24 nobody monitor
	Supports horizontal screen and vertical screen automatic configuration
	Support wireless screen projection(Optional)
	Remote Upgrade
Functional Indicators	
Support Video Format:	AVI（H.264、DIVX、XVID），rm，rmvb， MKV（H.264、DIVX、DIVX、XVID），WMV，MOV，MP4 （H.264、MPEG、DIVX、XVID），FLV（H.263，H.264），TS，3GP，MPG etc

Support Picture Format：	BMP、JPEG、PNG、GIF etc normal format
Support Audio Format：	MP3、WAV、WMA、AAC、3GP etc normal format
Volume	Management platform can adjust
Timing on/off	Support
Play mode	Cycle play, slot, timing, fixed and other play mode
Electrical specifications and product dimensions	
Power Specification	Input voltage range: AC100V to 240V
Megaphone Power	10W×2
Max Power Consumption	≤230W
Standby Power Consumption	≤1W
Working Temperature	0℃～40℃

Working Humidity	10%～90%， no condensation
Storage Temperature	-20℃～60℃
Appearance Size	(L)1477mm (W)709mm(H)23.4mm （Border width12mm）
Installation	Vertical screen hanging
Entire machine NW	39KG
Accessory	
Instruction sheet	×1set
Remote Control/Battery	×1set
Wifi	×1pc
Power cord	×1pc
Lifting accessory	×1set

4. Software Description:

Material delete, rename, preview, upload, new folder, copy, paste, copy, delete, search, drag material to the folder and other functions

Support various material format (Picture, background, video, music, word, excel, PPT, PDF, Web, Media, apk, buttons)

Import/export template, select all/deselect all, single/multiple selection, Share/deselect share

Create page:
Program create page template screening, template search, template production pop-up Settings
Program scene:
1. Add, delete, copy, and set the scene duration to the main scene
1. Add, delete, copy, and set the scene duration to the Sub-scene

Add jump functionality:
1. Add jump functionality to images, videos, scenes, and web pages, including jump duration settings.

Set jump functionality (touch):
1. Set jump functionality for images, including adding, deleting, replacing, and dragging jump materials.
2. Functionality for adding, deleting, editing, customizing button styles, and adjusting button effects for buttons such as Previous, Next, Home, Close, Double-tap to exit, Left/right swipe selection, Left/right page turning, and Up/Down swipe.

Setting up navigation:
1. Image navigation functionality, including adding, deleting, replacing, and dragging navigation elements.

2. Functionality for adding, deleting, editing, customizing button styles, and adjusting button effects for buttons such as Previous, Next, Home, Close, Double-click to Exit, Left/Right Swipe Selection, Left/Right Page Turning, and Up/Down Swipe.

Selection Alignment: Left alignment, horizontal centering, top alignment, right alignment, vertical centering, bottom alignment, horizontal distribution, and vertical distribution selection functionality. Control Right-Click Properties:

1. Functions for deleting and adding navigation elements, copying, pasting, filling, deleting, and bringing to top, bringing to bottom, previous level, and next level for controls.
2. Right-click properties for text, image, video, music, Word, Excel, PPT, PDF, mixed playback, weather, date, countdown, webpage, streaming media, exchange rate updates, stock updates, APK, signal source, and other control elements.

Publishing Settings:
1. Control the playback priority order of regular programs, inserted programs, exclusive programs, and filler programs.
2. Functions for program playback date, terminal selection, saving, and submission.
3. Device selection interface: organization tree, selection, search, and conditional filtering.

The program includes functions such as searching, sorting, editing, publishing, deleting, viewing details, previewing, and pagination. During editing, the program's content can be repeated (sections 3.1-3.10).
Release progress statistics in the release details pop-up window;
Deleting a program on a specified terminal.
The playback schedule creation page includes functions such as setting the schedule name and playback date, adding programs (including searching, pagination, sorting, previewing, and selecting programs), adding playback time segments, dragging time segments, saving, and clicking "Next."
Message functions include saving, clicking "Next," selecting message name, message type, message content, playback speed, start time, end time, font size, font color, background color, and background transparency.
